THE FUTURE OF MEDICINE STARTS NOW 2019 (2nd edition)

Venue: Porto Antico di Genova - Centro Congressi Genoa

GENOA (ITALY), SEPTEMBER 26th-27th, 2019

WELCOME LETTER

Why attending this meeting?

In 2017 we organized a meeting that we named “The Future of Medicine Starts Now”. The purpose was to discuss the new sophisticated technologies that very rapidly are paving the way to major new diagnostic and therapeutic opportunities and are producing a substantial revolution in medicine.

Given the success of the previous meeting we decided, together with Menarini Foundation, to organize this second edition that accordingly we have named “The Future of Medicine Starts Now 2019 (2nd edition)”.

This year the program includes new topics as well as updates of the previous ones.

We have assembled a number of worldwide famous Speakers that are absolute leaders in their field. Lectures will encompass various topics including genomic, genetic engineering, gene therapy, rejuvenation, system biology and “in silico” medicine in the frame of the 4 P medicine: Predictive, Preventive, Personalized and Participatory.

A round table will focus on the organization of life science research Institutions and a section will be devoted to inflammation and to its major role in the pathogenesis of a very vast array of diseases.

It does not occur very often that, in only two days, you can learn so much in the field of biomedical science with no registration fee.

We therefore hope that our effort will convince many people to participate.

We are ready to welcome you in Genoa at end of September 2019.

Presidents of the Meeting
Francesco Frassoni and **Alberto Martini**
