

October 21st, 2016

15.00 – 19.00

***Eginitio University Hospital Auditorium
Vas. Sofias 72-74, Athens 11528***

Co-Chairs: Panagiota Boura – René van Lier

PROGRAM

15.00 – 15.15

René van Lier

An introduction to EFIS

15.15 – 15.35

Lorenzo Moretta

Human NK cells: from biology to clinical applications

15.35 – 15.55

Aikaterini Stavropoulos - Gioka

Stem cells in autoimmunity

15.55 – 16.15

Andreas Radbruch

Adaptation of T cells to chronic inflammation

16.15 – 16.35

Winfried Pickl

The role of T regulatory cells in health and disease

Break

17.00 – 17.20

Maria Mytilinaiou

The immunopathophysiology of IgG4-related diseases

17.20 – 17.40

Marieke van Ham

Induction and termination of T-cell-mediated B cell responses

17.40 – 18.00

Paola Castagnoli

CD103+ Dendritic Cells Control Th17 Cell Function in the Lung

18.00 – 18.20

Pablo Engel

Immunoglobulin superfamily genes captured by viruses for immune evasion

18.20

Panagiota Boura – René van Lier

Discussion and Conclusions

Admission: Free
